And our dynamic sales, creative and administrative staff keep us inspired and our business moving forward. Learn more by visiting [www.AcceleratedAnalytics.com](http://www.AcceleratedAnalytics.com).

### Location

Bradenton, FL

### Job Description

The Azure System Administrator is responsible for all aspects of the Accelerated Analytics Azure environment. They will work closely with the engineering team and strategic management. The position reports to the Director of Technology.

### Responsibilities

- Manage the Accelerated Analytics Azure environments (Development, Testing and Production)
- Monitor performance on all environments (CPU, disk space, etc.) to ensure smooth running of all environments
- Limit downtime on all environments
- Advise on, and implement, different environments for different requirements, including (but not limited to):
  - Different setups for development, testing and production environments
  - Very intensive data processing environments
  - Environments that require high guaranteed uptime
  - Environments that can automatically scale depending upon processing requirements
  - Environments with and without external OLAP access
  - Light data processing environments
  - Small one-off projects
  - Research and development projects
  - Physical versus cloud-based SQL databases
  - Scalable solutions
- All aspects of cloud security
- Manage firewalls, VPNs, and remote access to servers, based on different user roles and access requirements
- Manage cloud-based FTP and other forms of file sharing
- Backups, restorations and disaster recovery
- Research into, and implementation of, new Azure tools to improve efficiency, performance, and cost-effectiveness
- Monitor and report to management on actual and projected monthly costs

### Requirements

- At least three years working as an Azure system administrator
- Experience working with Business Intelligence and Data Warehousing on Azure
- Experience implementing Microsoft SQL Server, SSIS, SSRS, SSAS on Azure
